

# 2023 Checklist for Health Care Organizations

Health care has experienced dramatic shifts in the last three years and shows no signs of returning to pre-pandemic norms. As a result, health care organizations have new requirements to meet patient expectations, support clinician needs, and achieve strategic goals.

Use this checklist to evaluate areas of opportunity for your organization:

- Strong business foundation to support scalable clinical solutions
- Local care delivery enabled by regional leadership and a nationwide infrastructure
- Professional documentation and coding support to maximize clinician time with patients
- Resource and training stability with opportunities for continuing education and leadership development
- Modern solutions focused on eliminating gaps in care and achieving strategic goals
- Focus on innovation and utilizing technology to enable an integrated and people-powered approach to patient care
- Constant evolution in acute clinical care delivery, maintaining quality while optimizing resources for sustainability
