

Your seamless start: The clinician experience difference

At SCP Health, we know your time is precious. That's why we've reimagined the entire onboarding process to allow you to focus on patient care faster, with less hassle and more support.

One contact, endless support

Instead of juggling multiple contacts across credentialing, enrollment, scheduling, and payroll, you get one dedicated specialist who knows your case inside and out resulting in:

- Faster response times to your questions
- Consistent communication you can count on
- Someone who understands your specific situation and needs
- Less time navigating internal processes, more time preparing for your new role

From application to first shift: Built for speed

Our streamlined workflows and integrated technology eliminate the typical delays that often keep clinicians waiting weeks or months to start. We've removed the friction points that make traditional onboarding frustrating so you:

- Get up to speed and integrate into the team sooner
- Have reduced administrative burden during your transition
- Know clear timeline expectations
- Receive automated reminders for credential renewals

Technology that works for you, not against you

Access to the mySCP platform from day one, giving you everything you need in one place—scheduling, communication, documentation, and more through:

- Single sign-on access to technology tools
- Mobile-friendly platform that works wherever you are
- Real-time updates on your schedule and important announcements
- Streamlined documentation to save time every shift

We are committed to removing the administrative hassles that pull you away from what you do best: caring for patients.
